

# SWITCH DISCONNECTORS

# PV switch disconnector LS DC

The construction of the switch ensures reliable switching up to 1500V.

The construction of the contacts and the material selection guarantee that no oxidation (small switching frequency develops, and is thus prevented inadmissible heating-up).

The switch disconnector has 2, 4 or 4+2 contacts, by serial / parallel wiring of the contacts the contact rating will be increased.

The switching speed at the manually operated handle does not have an effect on the switching attitude of the contacts.

## General characteristics

Rated voltage	$\leq 1500\text{V d.c.}$
Rated current	$\leq 58\text{A}$
Standards	IEC 60364-7-712
Application	For interupting the DC/AC inverter from the solar panels

## PV switch disconnector for photovoltaic systems

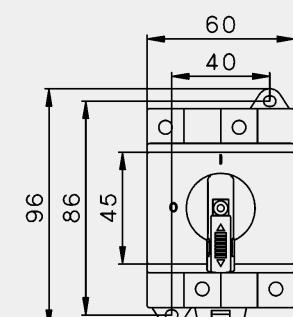

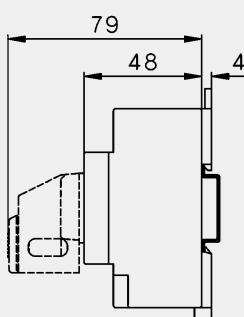

Code	Type		Weight [g]	Packaging [pcs]
004660060	LS16 SMA A2			
004660061	LS25 SMA A2	2-pole		
004660062	LS32 SMA A2		150	
004660063	LS16 SMA A4			1
004660064	LS25 SMA A4	4-pole		
004660065	LS32 SMA A4			
004660066	LS32 SMA A4+2	4+2 pole	430	
004660067*	LSV-B1	-	6,6	100

Switch disconnectors "LS..." are switch gears for interupting DC/AC-inverter from the solar-panels.

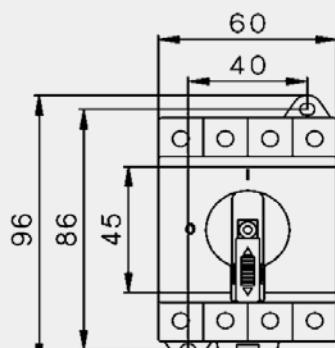

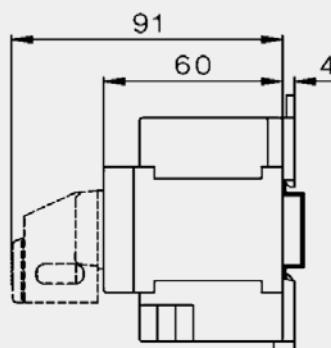

Photovoltaic-installations have to be equipped with DC-isolators according to IEC 60364-7-712.

\*Insulated Jumper

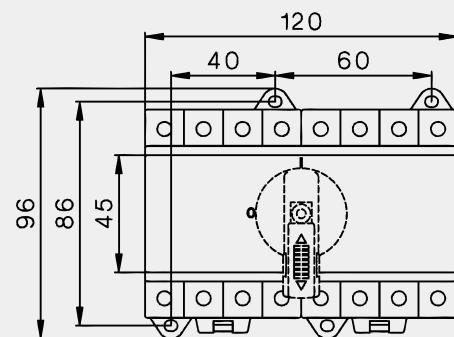

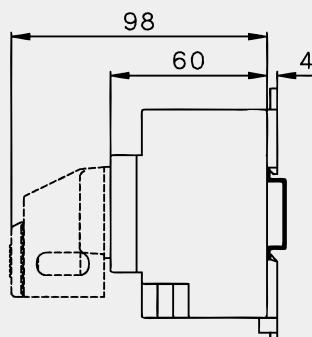

LS32 SMA A4+2 has already installed jumpers for series and parallel connection.

Because of very high breaking point capacity, switch disconnectors "LS..." are suitable for many different operating conditions.

# PV switch disconnector LBS DC

## Switch disconnectors

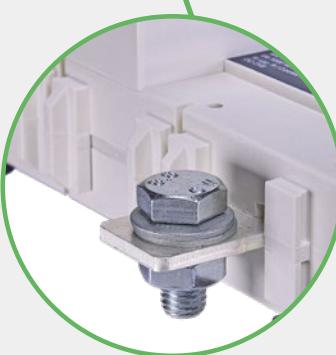

→ Mounting system provides better cooling

→ Handle position indicate true position of switch.

→ Due to perforated protection covers it is possible to measure contacts temperature without removing covers.

→ Possible to lock handle with 3 locks.

→ Package includes connection screws.

→ Indicator provides contacts position.

LBS DC are manually operated multipolar load break switches.

Making and breaking capacity under load conditions up to 1500 VDC.

These extremely durable switches have been tested and approved for use in the most demanding applications. They have been designed and tested for all types of applications: earthing, floating or bipolar.

- Thanks to a reduced number of bridging bars, you can limit your costs and save mounting time

- A 2 pole switch has reduced warming and can be placed in a smaller enclosure

- can be directly connected to up to four independent PV panel strings (4 pole switch)

- tested to critical currents and at 10kA short circuit during 50 ms without specific protection

High quality materials glass fibre reinforced polyester frame provide:

- high mechanical strength,

- stability to temperature variations (RTI of 130 °C)

- high dielectric strength (high CTI / tested as per standard ASTM D 2303)

#### General characteristics

Rated voltage	1500 VDC (500 VDC/pole) IEC 60947-3
Rated current	≤ 400A
Standards	IEC 60947-3, IEC 60364-7-712
Application	For interrupting DC circuits (PV, battery storage systems, etc.)

#### 1 PV circuit 1000 V DC

Type	Code No.	Nr. Of poles	Description	Current [A] / pole	Weight [g]	Packaging [pcs]
LBS 100 2P DC1000	004661853	2		100	1850	1

# LBS AC1000 load break switches (IEC 69047-3)

Heavy duty applications up to 1000 VAC - AC 22

## Advantages

- Improved performance
  - The rapid opening and closing, combined with the arcing chambers, ensure improved breaking performance.
  - Harsh service categories AC-22 under 1000 VAC.
- Robustness
  - Double breaking per pole (proven sliding system) offering durability and high short-circuit current withstand.
  - Made of glass fiber reinforced polyester for maximum thermal and mechanical resistance.

## Safe operation

- The position indicator is directly on the bar housing the moveable contacts, ensuring it can be seen in all circumstances.
- Ease of installation
  - Connection facilitated by the design of the external terminals:
  - good centre-to-centre distance (up to 65 mm),
  - copper connection up to 240 mm<sup>2</sup>,
  - large range of accessories to facilitate integration and operation.

## Applications

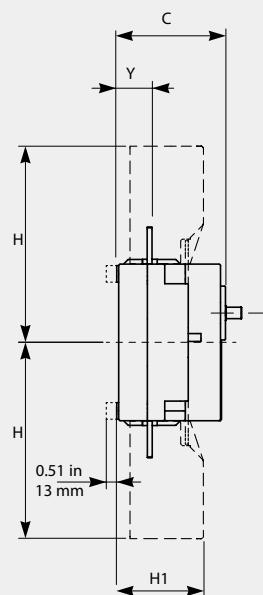

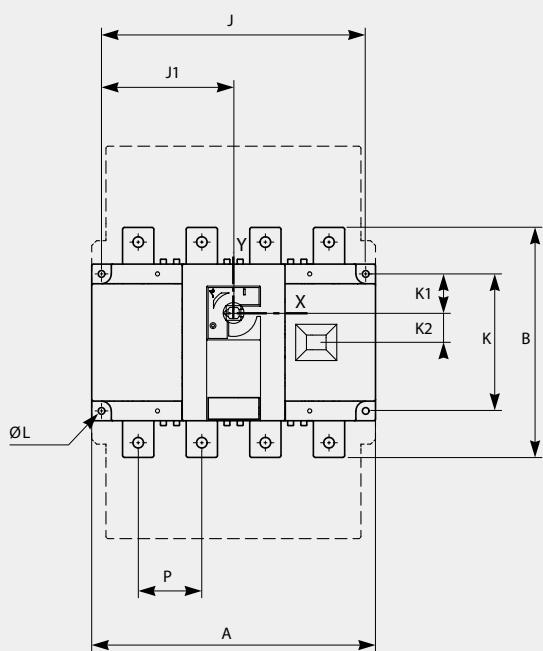

LBS AC1000 load break switches can be used in applications with non standard voltage levels. There are many PV inverters today on the market with higher output voltages (up to 800V AC).

Can be also used in applications with harsh operating conditions such as:

paper mills or the metallurgy, chemical, petrochemical or mining industries.

LBS AC is designed for all heavy duty applications up to 1000 VAC - AC 22. It offers a total adaptability to any environment thanks to a wide variety of accessories.
